Change Request Document

White Coat Clinic: EHR System

April 3rd, 2023

Change Request Form

Project Name	White Coat Clinic EHR System
Request No.	1
Name of Request	Clean up UI
Date	2023-04-03
Change Description	Throughout the presented application, the interface for some pages can often appear erratic in nature, and demonstrates a lack of clean structuring. We request that the application be updated to have a cleaner structure.
Change Reason	Information that is presented in a disorganized fashion can be hard for the user to understand.
Priority	Medium
Comments	See below image for example of disorganized page.

Change Request Form

Project Name	White Coat Clinic EHR System
Request No.	2
Name of Request	Make sidebar visible by default
Date	2023-04-03
Change Description	In the application, the sidebar is by default collapsed. To open the sidebar, the user must click the hamburger menu icon. We suggest that this be changed so that the sidebar is visible by default.
Change Reason	Having the sidebar be collapsed by default can make navigating between pages tedious, as having to click the hamburger icon each time is a repetitive task.
Priority	Medium
Comments	N/A

Change Request Form

Project Name	White Coat Clinic EHR System
Request No.	3
Name of Request	Implement the ability to edit schedule
Date	2023-04-03
Change Description	On the schedule page, it appears as if the information present can not be edited. We believe that this should be changed, so that an "edit" and "delete" button are present for each schedule item.
Change Reason	Having the ability to edit and delete schedule information is crucial for our user base.
Priority	High
Comments	If a method to edit and delete schedule information exists and just was not shown in the video, disregard this change.

Change Request Form

Project Name	White Coat Clinic EHR System
Request No.	4
Name of Request	Implement navigation from home page to medical history
Date	2023-04-03
Change Description	Currently, you cannot navigate from the home page to medical history through the buttons on screen. You must instead navigate through the sidebar. We request that this be changed so that you can navigate from the home page to the medical history page.
Change Reason	Implementing this change will make the design choices of the application more consistent, and provide a more consistent experience to the user.
Priority	Low
Comments	N/A
